reusable benefit components

benefits synthesis & simplification

consolidated benefit plans

claims adjudication engine

clients operations audits
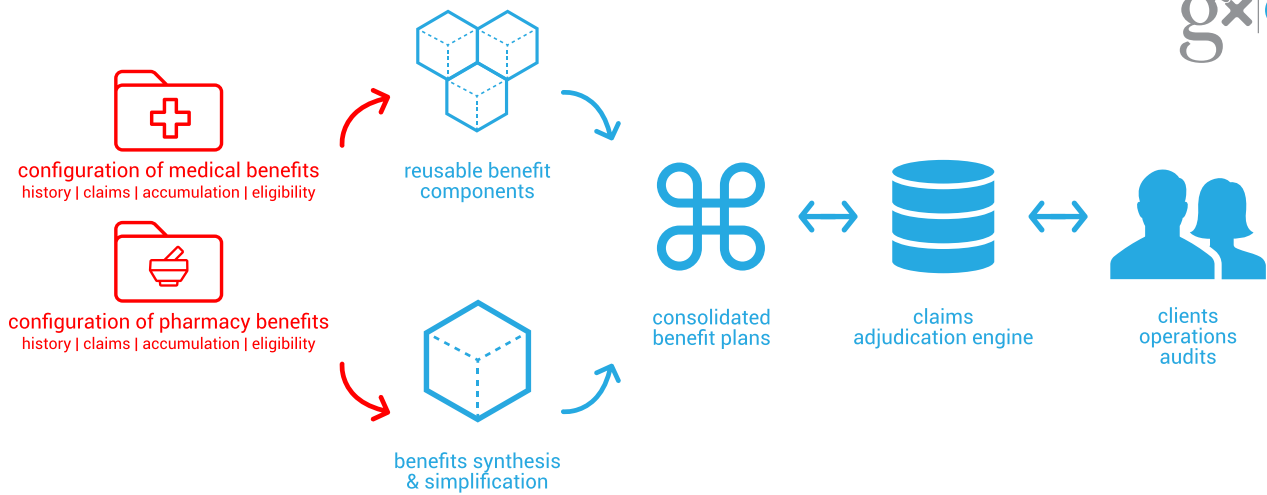

GxCare® is an automated benefits plan management system for benefit intake, modeling and cataloging that provides clients simplified benefits access for easier benefits maintenance and complete traceability. Automated benefit certification and benefit reuse are just some of the advantages that will drive increased operations efficiency, accuracy and enhanced speed to market. Designed to be scalable and flexible with rules-driven translations and benefit loading, GxCare® traceability means you are always audit-ready.

Medical & Pharmacy Benefits Management Application

The management, maintenance and migration of benefit plans are a time consuming and potentially error-prone task that has a direct impact on performance. GxCare® provides key opportunities to automate a majority of the analytical, management, migration and testing activities associated with benefit management and has proven to be 67% faster with an 85% reduction in errors.

Key features of GxCare® include:

- **Benefit Plan Management** - Collect, interpret, and analyze plan data to develop a road map for long-term sustainability

- **Formulary Management** - Streamline processes

- **Benefit Plan Design** - Increase quality and efficiency of plan design and reduce number and volume of manual and administrative tasks

- **Error Reduction** - Reduce costs and error rates arising out of coding, typing, or translation in the manual process and deliver a high degree of predictability and accuracy in plan performance

- **Speed to Market** - Facilitate rapid speed to market including the capability to support multiple iterations of design, analysis, testing and certification, feedback and redesign

- **Adjudication System** - Externalize the adjudication system's plan design structures and behavior

76% increase in efficiency through the use of automation

82% reduction in errors, decreasing performance penalties

51% reduction in production errors

Points of value:

- Increase your bottom line
- Minimize audit impact and duration
- Minimize negative business impact resulting from human errors

To unleash the full power of GxCare®, use with GxCapture™ (intent capture) and GxClaims® (claims verification).
